

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

British Columbia Investment Management Corporation ("BCI") manages Pooled Investment Portfolios on behalf of governing fiduciaries such as pension fund trustees and other public sector clients. QuadReal Property Group Limited Partnership and affiliates ("QuadReal") manage the Mortgage and Real Estate programs pursuant to asset management agreements as agreed to between BCI and QuadReal. This report contains the financial statements for BCI QuadReal Real Estate Debt for the year ended December 31, 2023.

The financial statements of this Pooled Investment Portfolio have been prepared by QuadReal and approved by the BCI Chief Investment Officer / Chief Executive Officer. These financial statements have been prepared in accordance with IFRS Accounting Standards. The significant accounting policies used in the preparation of these statements are disclosed in note 3 to the financial statements. The statements include certain amounts that are based on management's judgement and best estimates.

BCI's Board has established an Audit Committee. The BCI Audit Committee's mandate includes oversight of the financial statements of the Pooled Investment Portfolio managed by QuadReal through a governance framework established with QuadReal's Board and Audit Committee. Through this governance framework, the BCI Audit Committee mandate is executed through oversight from QuadReal's Audit Committee and includes making recommendations on the appointment of the external auditor for the Pooled Investment Portfolio, reviewing the external audit plan, reviewing BCI's System and Organization Controls Report for the Investment System of British Columbia Investment Management Corporation, including QuadReal related controls, and reviewing the annual audited financial statements of the Pooled Investment Portfolios. The BCI Audit Committee and QuadReal Audit Committee review the recommendations of the internal and external auditors with respect to internal controls and the responses of management to those recommendations, and also meet with management and the internal and external auditors to review annual audit plans.

BCI and QuadReal maintain a system of internal control and supporting processes to provide reasonable assurance that assets are safeguarded; that transactions are appropriately authorized and recorded; and that there are no material misstatements in the financial statements. BCI's and QuadReal's internal control framework includes: a strong corporate governance structure; a code of conduct that includes conflict of interest guidelines; an organizational structure that provides for appropriate segregation of duties and accountability for performance; an enterprise-wide risk management framework that identifies, monitors and reports on key risks; and adherence to BCI Board approved Pooled Investment Portfolio Policies and client-approved investment mandates. BCI's and QuadReal's system of internal control is supported by external auditors who review and evaluate internal controls and report directly to the BCI and QuadReal Audit Committees.

The Pooled Investment Portfolio's external auditors, KPMG LLP, have full and unrestricted access to the BCI and QuadReal Audit Committees and BCI and QuadReal management. KPMG LLP discusses with management and the Committees the results of their audit of the Pooled Investment Portfolio financial statements and related findings with respect to such audit. The Pooled Investment Portfolio financial statements are audited by KPMG LLP in accordance with Canadian generally accepted auditing standards. KPMG LLP has performed such tests and other procedures as they considered necessary to express an opinion on the Pooled Investment Portfolio financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Unitholders of the BCI QuadReal Real Estate Debt managed by the British Columbia Investment Management Corporation

Opinion

We have audited the financial statements of the BCI QuadReal Real Estate Debt (the "Fund"), which comprise:

- the statement of financial position as at December 31, 2023
- the statement of comprehensive income (loss) for the year then ended
- the statement of changes in net assets attributable to holders of redeemable units for the year then ended
- the statement of cash flows for the year then ended
- and notes to the financial statements, including a summary of material accounting policy information (Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2023, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our auditor's report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

BCI QuadReal Real Estate Debt Page 2

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
 - The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

BCI QuadReal Real Estate Debt Page 3

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

1. The portfolios

British Columbia Investment Management Corporation ("BCI") was established under the Public Sector Pension Plans Act as a trust company authorized to carry on trust business and investment management services. The address of BCI's registered office is at 750 Pandora Avenue, Victoria, British Columbia, Canada.

QuadReal Property Group Limited Partnership ("QuadReal") and affiliates manage BCI QuadReal Real Estate Debt (the "Fund") pursuant to an Asset Management Agreement between BCI and QuadReal. These financial statements have been prepared by QuadReal.

Under the Public Sector Pension Plans Act and the Pooled Investment Portfolios Regulation, B.C. Reg. 447/99 (the "Regulations"), BCI may establish and operate pooled investment portfolios ".... in which money from trust funds, special funds or other funds, other public money and the money of government bodies and designated institutions may be combined in common for the purpose of investment by means of investment units of participation in a pooled investment portfolio." In addition, pooled investment portfolios previously established under the Financial Administration Act and the Pooled Investment Portfolios Regulation, B.C. Reg. 84/86, were continued under the Pooled Investment Portfolios Regulation, B.C. Reg. 447/99, to be held in trust by BCI and invested by the Chief Investment Officer ("CIO") of BCI.

The Fund was established on November 26, 2020 and invests in a diversified portfolio of high quality privately negotiated mortgages, real estate debt and various related investments via its wholly owned subsidiaries, the Canadian Mortgage Fund and the US Mortgage Opportunity Fund (collectively the "Mortgage Funds").

2. Basis of presentation

(a) Statement of compliance

These financial statements have been prepared in compliance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB"). These financial statements were authorized for issue by the BCI Chief Executive Officer / Chief Investment Officer on June 24, 2024.

(b) Basis of consolidation

Mortgage investments are held through the Mortgage Funds, which in turn holds investments through a limited partnership and private corporations funded by equity and debt. The Fund is an investment entity, and as such, does not consolidate the entities it controls. Instead, interests in subsidiaries are classified at fair value through profit and loss, and measured at fair value.

The Fund qualifies as an investment entity as it meets the following definition of an investment entity outlined in IFRS 10, Consolidated Financial Statements ("IFRS 10"):

- obtains funds from one or more investors for the purpose of providing those investor(s) with investment management services
- commits to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

2. Basis of presentation (continued):

- (b) Basis of consolidation (continued):
 - measures and evaluates the performance of substantially all of its investments on a fair value basis

(c) Basis of measurement

These financial statements have been prepared on a cost basis except for investments, credit facility, and redeemable units which are measured at fair value.

(d) Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Fund's functional currency.

(e) Use of estimates and judgement

The preparation of financial statements in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenue and expenses. In determining the fair value of some of the Fund's investments, management reviews and assesses the estimates and assumptions regarding investment industry performance and prospects, as well as general business and economic conditions that prevail. By nature, these asset valuations are subjective and do not necessarily result in precise determinations. Financial results as determined by actual events could differ from those estimates and assumptions, and the difference could be material.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized in the period in which the estimates are revised and in any future period affected. The significant area of estimate in connection with the fair value of investments relates to the use of unobservable inputs in deriving fair value and is further discussed in note 10.

3. Material accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

(a) Financial instruments

(i) Recognition and measurement:

Financial instruments are required to be classified into one of the following categories: amortized cost, fair value through other comprehensive income ("FVOCI") or FVTPL. All financial instruments are measured at fair value on initial recognition. Measurement in subsequent periods depends on the classification of the financial instrument. Transaction costs are included in the initial carrying amount of financial instruments except for financial instruments classified as FVTPL in which case transaction costs are expensed as incurred.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

3. Material accounting policies (continued):

- (a) Financial instruments (continued):
 - (i) Recognition and measurement (continued):

Financial assets and financial liabilities are recognized initially on the trade date, which is the date on which the Fund becomes a party to the contractual provisions of the instrument. The Fund derecognizes a financial liability when its contractual obligations are discharged, cancelled or expired.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position only when the Fund has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

A financial asset that is a debt instrument is measured at amortized cost if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at FVOCI if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows and sell financial assets
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Fund may irrevocably elect to measure financial assets that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL when doing so results in more relevant information.

Financial assets are not reclassified subsequent to their initial recognition, unless the Fund changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

The Fund has not classified any of its financial assets as FVOCI.

Financial liabilities are generally measured at amortized cost, with exceptions that may allow for classification as FVTPL. These exceptions include financial liabilities that are mandatorily measured at FVTPL such as derivative financial liabilities. The Fund may, at initial recognition, irrevocably designate a financial liability as measured at FVTPL when doing so results in more relevant information.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

3. Material accounting policies (continued)

(a) Financial instruments (continued):

(ii) Fair value through profit and loss:

Financial instruments classified as FVTPL are subsequently measured at fair value at each reporting period with changes in fair value recognized in the Statement of Comprehensive Income (Loss) in the period in which they occur. The Fund's investments, credit facility, and redeemable units are designated as FVTPL.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fund's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The fair value of financial assets and liabilities that are not traded in an active market, is determined using valuation techniques. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and others commonly used by market participants and which make the maximum use of observable inputs. Should the value of the financial asset or liability, in the opinion of management, be inaccurate, unreliable or not readily available, the fair value is estimated based on the most recently reported information of a similar financial asset or liability.

(iii) Amortized cost:

Financial assets and liabilities classified as amortized cost are recognized initially at fair value plus or minus any directly attributable transaction costs. Subsequent measurement is at amortized cost using the effective interest method, less any impairment losses. The Fund classifies cash, distributions receivable, accounts receivable, and other accounts payable as amortized cost.

The effective interest method is a method of calculating the amortized cost of a financial asset or liability and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial asset or liability, or where appropriate, a shorter period.

(b) Redeemable units

The Fund classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. In accordance with the Regulations, the Fund is required to distribute, to holders of the Fund's redeemable units, the taxable income and taxable capital gains of the Fund at least annually. The units are classified as financial liabilities at FVTPL and measured at the redemption amount. Distributions to holders of redeemable units are recognized in comprehensive income when they are authorized.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

3. Material accounting policies (continued):

(c) Issuance and redemption of units

Participation in the Fund is expressed in units. The initial value of a unit on inception was \$1,000. For each subsequent unit issuance and redemption, the unit value is determined by dividing the fair value of the net assets of the Fund by the total number of units outstanding. Where one fund invests in another fund, the unit issuances and redemptions are transacted on the same basis as client transactions. All unit transactions are recorded on a trade date basis. The Fund is an open participation fund where eligible clients may increase or reduce their proportionate ownership annually or on special opening dates.

(d) Foreign exchange

These financial statements are denominated in Canadian dollars. Foreign denominated investments and other foreign denominated assets and liabilities are translated into Canadian dollars using the exchange rates prevailing on each valuation date. Purchases and sales of investments, as well as income and expense transactions denominated in foreign currencies, are translated using exchange rates prevailing on the date of the transaction. Foreign currency gains and losses are recognized in the Statement of Comprehensive Income (Loss).

(e) Income recognition

Investment income is recognized on an accrual basis using the effective interest method. Portfolio transactions are recorded on the trade date. Realized gains and losses arising from the sale of investments are determined on the average cost basis of the respective investments. The year-over-year change in the difference between the fair value and the cost of the investments held at year-end is recognized as a net change in unrealized appreciation (depreciation) of investments. Commissions and other identifiable transaction costs that are directly attributable to the acquisition or disposal of an investment are expensed as incurred.

(f) Income taxes

The Fund is established in accordance with the Pooled Investment Portfolios Regulation and its assets are held in trust by BCI; it is immune from taxation by virtue of BCI being a provincial Crown agent.

4. Recent accounting pronouncements

The Fund has adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) from January 1, 2023. The amendments require disclosure of "material" rather than "significant" accounting policies. Replacing "significant" with "material" means that management's assessment of the accounting policy information to be disclosed is based on a defined term in IFRS Accounting Standards. The amendments provide guidance on the application of materiality to account policy disclosures and aim to assist entities with providing more relevant, company-specific disclosures. Management has reviewed the accounting policies disclosed in note 3 Material accounting policies (2022 - Significant accounting policies), and ensured the disclosures are in accordance with the amendments.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

5. Related party transactions

The Fund's related parties include QuadReal, BCI, the Province of British Columbia and related entities, investments where the Fund or the underlying Mortgage Funds have a controlling interest or significant influence, entities with common ownership, and other related entities for which BCI and QuadReal provides investment management services. The Fund had the following transactions with related parties during the year.

(a) BCI and QuadReal cost recoveries

The Fund, via the wholly owned Mortgage Funds, is charged cost recoveries from BCI and QuadReal for fund management costs paid by BCI and QuadReal. BCI and QuadReal cost recoveries and the related payables are recognized in the Mortgage Funds' Statement of Comprehensive Income (Loss) and Statement of Financial Position, respectively.

(b) Investment in Mortgage Funds

The Fund is the sole holder of redeemable units of the Mortgage Funds. As at December 31, 2023, the investment in the Mortgage Funds had a value amounting to \$6,332,489 (2022 - \$5,602,028) and during the period, the Fund recognized investment income of \$403,153 (2022 - \$669,759) from the Mortgage Funds. The full amount of the distribution income has been reinvested in the Mortgage Funds. A net change in unrealized depreciation of \$32,710 (2022 - \$26,666) was recognized in the current year from the Mortgage Funds.

(c) Investment in QuadReal

The Fund holds an interest in QuadReal, its manager, through units of bcIMC Realty management Investment Trust, the sole limited partner of QuadReal, at a value equivalent to 10.66% of the outstanding interest of the manager. As at December 31, 2023, the investment in QuadReal had a value amounting to \$86,879 (2022 - \$73,192), with a net change in unrealized appreciation of \$13,687 (2022 - appreciation of \$5,117) recorded during the year. The Fund recognized investment income of \$10,117 (2022 - \$18,111) from QuadReal, of which \$1,331 (2022 - \$1,332) is receivable as at December 31, 2023. The settlement of the receivable occurred in Q1 2024.

(d) Related party loans

The Fund extended credit to QuadReal Finance Inc., a wholly owned entity by BCI, through the US Mortgage Opportunity Fund in the form of two revolving loans – one variable rate loan in the aggregate principal amount of up to US\$3,000,000 with a maturity date of March 26, 2028, and one participating rate loan in the aggregate principal amount of up to US\$2,000,000 with a maturity date of March 26, 2028, for the purpose of financing the origination and acquisition by QuadReal Finance Inc. of U.S. mortgage loan investments. As of December 31, 2023, the market value including accrued interest of the variable rate loan outstanding was \$1,493,446 (US\$1,132,600) (2022 - \$1,251,509 (US\$923,657)) and the participating rate loan outstanding was \$926,119 (US\$702,351) (2022 - \$743,432 (US\$551,235)).

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

5. Related party transactions (continued):

(d) Related party loans (continued):

The interest on the variable rate loan is based on SOFR plus 3.28% and the interest on the participating rate loan is based on the lesser of 95% of the net profit of QuadReal Finance Inc. over the average outstanding principal amount of the loan during the interest period or 12% per annum. During the year, the US Mortgage Opportunity Fund recognized \$121,530 (US\$90,215) (2022 - \$96,275 (US\$72,575)) interest income from the variable rate loan and \$50,626 (US\$38,394) (2022 - \$27,914 (US\$20,602)) interest income from the participating rate loan.

(e) Sale of mortgage investments

During the year, the Fund, through one of its wholly controlled entities, entered into purchase and sale transactions of mortgage investments with QR US Finance AP 2022 LLC and QR Real Estate Capital REIT LLC respectively, which are affiliated entities also managed by QuadReal. Total assets transferred from each of the transactions were at fair value determined in accordance with the Fund's investment valuation policies as disclosed in note 10, and in aggregate amount to approximately US\$185,059.

6. Credit facility

In May 2021, the Fund established a three-year \$250,000 revolving unsecured committed credit facility with the Toronto-Dominion Bank ("TD Credit Facility") to support general funding requirements. In August 2023, the credit facility was amended to include a two-year extension and an increase in the commitment to \$805,000. Draws on the credit facility are available in the forms of BA instruments, Canadian Prime Rate advances, U.S. Base Rate advances and SOFR Rate advances bearing respective benchmark interest rates plus a margin. A standby fee is charged on the unused commitment of the credit facility. During 2023, all advances were made in the form of BA instruments. The cost of borrowing on such instruments is CDOR plus 120 basis points after the amendment. Publication of CDOR will continue until June 28, 2024, with the reference rate being replaced by the Canadian Overnight Repo Rape Average ("CORRA").

As at December 31, 2023, the Fund had \$420,000 (2022 - \$0) drawn and outstanding.

| | 20 | 23 | 202 | 22 |
|-----------------|----------------|--------------|------------|--------------|
| | Fair value | Amount drawn | Fair value | Amount drawn |
| Credit facility | \$ 418,178 | \$ 420,000 | \$ _ | \$ — |

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

7. Redeemable units

The Fund is authorized to issue an unlimited number of redeemable units. Redeemable units issued and outstanding represent the capital of the Fund. The Fund is not subject to any internally or externally imposed restrictions on its capital. The capital of the Fund is managed in accordance with the Fund's investment objectives, including managing the redeemable units to ensure a stable base to maximize returns to all investors, and managing liquidity in order to meet redemptions.

The following is a summary of the changes in the number of redeemable units outstanding during the year:

| | 2023 | 2022 |
|--|-------------|-------------|
| Outstanding, beginning of period | 5,197.775 | 5,807.297 |
| Issued in exchange for units of the Mortgage Funds | _ | 118.149 |
| Issued for cash | 1,705.377 | 2,213.495 |
| Issued on reinvestment of distributions | 312.343 | 592.562 |
| Consolidation of units | (312.343) | (592.562) |
| Redeemed | (1,817.528) | (2,941.166) |
| Outstanding, end of period | 5,085.624 | 5,197.775 |

8. Unfunded committed capital

Unfunded capital commitments relating to mortgage investments represent total commitments minus net contributions outstanding as of the reporting date. Net contributions equal contributions less any recallable capital distributions. Recallable capital are distributions that may be recalled at some future date. Thus, due to changes in recallable capital, unfunded commitments may change at different reporting dates. Commitments on mortgage investments are made through the underlying holding entities. Although commitments can be made in Canadian or US dollars, they are reported in Canadian dollars.

As at December 31, 2023, the Fund indirectly through the holding entities has \$1,429,493 (2022 - \$3,116,902) contractual undiscounted cash commitments.

9. Financial risk management

(a) Risk management framework

The Fund's overall risk management program seeks to minimize the potentially adverse effect of risk on the Fund's financial performance in a manner consistent with the Fund's investment objectives. In the normal course of business, the Fund is exposed to financial risks including credit risk, liquidity risk, and market risk (including interest rate risk, currency risk and other price risk). The level of risk varies depending on the investment objective of the Fund and the type of investments it holds. The mandates and investment policies of the Fund are described below.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

(a) Risk management framework (continued):

The Fund, through the Mortgage Funds, invests in a diversified portfolio of high quality privately negotiated mortgages, real estate debt, and various related investments on a direct or indirect basis. Investments may include mortgages providing stabilized fixed term as well as construction and mezzanine financing for real estate properties comprising multi-family residential, office, retail, student housing, hospitality, industrial, seniors housing, self-storage, data centres, life sciences, land lease communities, development land and income-producing land (e.g. agricultural land, parking facilities). The Fund does not provide mortgages for single-family homes; however, it may provide financing on single-family land subdivisions as well as condominium inventory mortgages. Any of these mortgages may be shared loans with other investors directly or within fund investments. In addition to mortgage investments and other real estate-related debt or debt-like investments, the Fund may invest in equity securities, structured securities, and an equity interest in QuadReal.

Mortgages and other debt investments are diversified by property type, geography, investment size and loan type. The manager assesses risk levels of individual investment opportunities. The risk factors that are evaluated include, but are not limited to: location, asset quality, tenant quality, green building features, borrower and covenantor's financial strength, loan to value ratio, loan to cost ratio, debt servicing ability and borrower's experience. This information is used to determine the risk premium for each investment. In addition to risk mitigation practices applicable to all real estate debt, the manager also mitigates risk for construction loans by providing financing to only experienced developers, obtaining cost consultant evaluations, requiring conservative loan-to-cost metrics and sufficient profit margin levels, as well as obtaining additional security provisions from borrowers where applicable. To reduce the potential for loss in the event of default, mortgage and other debt agreements may also include additional security provisions such as presales requirements, personal guarantees, corporate guarantees, completion guarantees, environmental indemnities, letters of credit and the pledge of additional collateral.

The Fund may deploy leverage to support overall portfolio growth and enhance projected returns. The Fund manages leverage risk by limiting the use of debt financing to a long-term target of 30 percent of the gross asset value of the Fund, with a 40 percent maximum. The use of leverage will focus on maintaining flexibility on investment decisions, while ensuring the lowest cost funding across the program is achieved.

The Fund may hold or transact in:

- First, second, and third mortgages, structured financing and/or equity participation investments on properties or land held for development;
- First mortgage bonds;
- Syndicated interests and/or other direct or indirect partial interests in mortgage loans, including
 - A/B Notes providing noteholders with a pro-rata interest in a first mortgage loan or loans, with the security in favour of holders of B Notes subordinated to the security in favour of corresponding A Notes; and

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

- (a) Risk management framework (continued):
 - Any other partial interests in mortgage loans that may be subordinated to the interests of other partial interest holders;
 - Real estate-related debt, preferred equity, and/or debt funds;
 - Equity securities of any kind in entities that invest in, own, operate, manage and/or otherwise provide services in connection with mortgage or real estate-related investments (collectively, "Equity Investments");
 - Structured securities, including Collateralized Loan Obligations (CLOs), Commercial Mortgage Backed Securities (CMBS) and K-Series mortgage securities (collectively, "Structured Securities");
 - Derivatives instruments for the purpose of risk control, lowering Transaction Costs, and/or liquidity management;
 - Units in pooled funds of external managers provided the holdings of such pooled funds are themselves permissible investments of the Fund;
 - Units in the BCI Canadian Money Market Fund (ST1), Canadian Money Market Fund (ST2), US Dollar Money Market Fund (ST3), and/or Canadian or US Government fixed income securities with a maximum term to maturity of 1 year, for cash management purpose; and
 - Units in the Floating Rate Funds.

BCI, as trustee, and QuadReal, as manager of the Fund, have the power to vary the investments and assets of the Fund and reinvest proceeds realized from the investments of the Fund all within the bounds of the investment policies, rules and restrictions established for and governing the Fund.

The Fund primarily holds its investments through the Mortgage Funds which in turn hold investments through underlying private corporations and a limited partnership. As at December 31, the Fund's total investments comprise of the following net assets directly and indirectly held by the Fund:

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

¹ Consist of unlisted mortgage investee funds.

The Fund's activities expose it to a variety of financial risks. For purposes of describing the financial risks of the Fund, the composition of the net assets held directly and indirectly by the underlying Mortgage Funds and their investing activities have been considered.

(b) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund, resulting in a financial loss to the Fund. It arises principally from mortgages investments held, cash and other receivables due to the Fund. The carrying value of these financial instruments as recorded in the Statement of Financial Position reflects the Fund's maximum exposure to credit risk.

The majority of the Fund's holdings are in uninsured first mortgages where the possibility of a borrower defaulting on payment obligations exists. To avoid undue credit risk, the Fund has established specific investment criteria, such as minimum credit ratings for investees and counterparties. The Fund's investments have conservative Loan to Value Ratios and include adequate collateral and guarantees from borrowers, guarantors and/or other covenantors. The Fund also invests in leveraged properties where the possibility of a borrower defaulting on payment obligations is higher than conventional mortgages. In exchange for the higher levels of risk associated with investments of this nature, the Fund requires additional compensation and/or additional security provisions. Management frequently monitors the credit rating of its counterparties as determined by credit rating agencies and assesses mortgage investments for impairment, including significant changes in credit risk.

In addition, macroeconomic and financial conditions of the industry sector in which a borrower operates in will impact its financial performance and ability to fulfill payment obligations. To mitigate this risk, the Fund diversifies its investments across various industry sectors. The following table presents exposure of underlying fixed and variable rate mortgages to different sectors as at December 31:

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

(b) Credit risk (continued):

| | | 2023 | | | 2022 | | | | | |
|-------------------------------|--------------|------------|----------|--------------|------------|----------|--|--|--|--|
| | | Investment | % of | | Investment | % of | | | | |

| mortgages | \$ 6,219,158 | 79 | 100.0 | \$ 5,341,028 | 98 | 100.0 | | | | |

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or other assets as contractually agreed. QuadReal's approach to managing liquidity risk is to ensure, as far as possible, that the Fund has sufficient liquidity to meet its liabilities when due.

The Fund is exposed to the liquidity risk associated with the requirement to redeem units. Redeemable units of the Fund may only be acquired by eligible clients or client groups in accordance with the Fund's purchasing limits that may be established by the CIO. In order to protect the interest of all clients, the CIO may also establish redemption limits for the Fund. The purchase and redemption limits may vary depending on market circumstances, client demand, and the liquidity of the underlying investments.

The Fund's cash position is monitored on a regular basis. QuadReal management utilizes appropriate measures and controls to monitor liquidity risk in order to ensure that there is sufficient liquidity to meet financial obligations as they come due. The Fund's liquidity position is monitored daily by taking into consideration future forecasted cash flows. This attempts to ensure that sufficient cash reserves are available to meet forecasted outflows. The Fund has certain credit facilities and programs available to support general funding requirements.

The Fund's financial assets include unlisted mortgage investments and mortgage investee funds, which are generally illiquid. As a result, the Fund may not be able to liquidate some of its investments in these instruments in time to meet obligations when they become due. However, the CIO may obtain funding from the unitholders of the Fund through additional unit issuances to meet the Fund's ongoing liquidity requirements.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

(c) Liquidity risk (continued):

The Fund's other financial liabilities are due within three months of the year-end of the Fund.

(d) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices, will affect the Fund's income or the fair value of its holdings of financial instruments.

(i) Interest rate risk:

Interest rate risk is the risk that the market value or cash flows of interest-bearing investments and loans will fluctuate due to changes in market interest rates.

The fixed rate mortgage investments are subject to interest rate risk. Lending rates for fixed rate mortgages are determined based on the current yield of government debt securities with a similar term to maturity plus a risk and liquidity premium. The Fund may invest in mortgages with maturities ranging from 1 to 15 years and has established duration bands based on their relevant benchmarks to manage undue active interest rate risk. The Fund's fixed rate mortgages have a weighted average term to maturity of 3.4 years (2022 - 2.4 years) and weighted average duration of 3.0 years (2022 - 2.1 years).

Lending rates for floating rate mortgages are determined based on bank prime lending rates plus a risk and liquidity premium. Therefore, the floating rate mortgages do not have significant exposure to interest rate risk.

As at December 31, the Fund invested in direct mortgages with the following terms to maturity. The fixed rate mortgages account for 36.4% (2022 - 27.0%) of the Fund's direct mortgage investments with an weighted average effective yield of 7.1% (2022 - 6.1%).

| | 2023 | | 2022 | |
|----------------------------|-----------------|-----------|-----------------|-----------|
| | | Weighted | | Weighted |
| | | average | | average |
| | | effective | | effective |
| | Total | yield % | Total | yield % |
| Fixed rate mortgages: | | | | |
| Within 1 year | \$ 331,248 | 6.5 | \$ 328,739 | 6.5 |
| 1 to 5 years | 1,855,630 | 7.3 | 1,112,187 | 6.0 |
| 6 to 10 years | 73,921 | 5.8 | | |
| Total fixed rate mortgages | \$ 2,260,799 | 7.1 | \$ 1,440,926 | 6.1 |

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

(d) Market risk (continued):

(i) Interest rate risk (continued):

If prevailing interest rates increased or decreased by 1% (100 bps), with all other variables held constant, the carrying value of the fixed rate mortgages would have decreased or increased by approximately \$50,706 (2022 - \$35,223), representing 0.8% (2022 - 0.5%) of the Fund's net assets. In practice, the actual results may differ from the above sensitivity analysis and the difference could be material.

Interest Rate Benchmark Reform

A fundamental reform of major interest rate benchmarks has been taking place globally. The reform aims to replace some interbank offered rates ("IBORs") with Risk-Free Rates ("RFRs") for certain products (referred to as "IBOR reform"). The Fund's exposure to IBOR reform is through its investment in mortgages that are being replaced or reformed as part of this market-wide initiative.

The main risks to which the Fund has been exposed as a result of IBOR reform are operational resulting from, for example, communicating with counterparties, amending contracts or existing fallback clauses, updating systems and processes that use IBOR curves and the revision of operational controls related to the reform. Financial risk is predominantly limited to interest rate risk.

QuadReal monitors and manages the Fund's transition to RFRs through evaluating the extent to which operational systems are impacted by the IBOR reform, providing updates and guidance on the transition to relevant stakeholders, and promoting awareness of changes to relevant stakeholders. To date, QuadReal has successfully adapted internal systems and processes and continues to monitor market and regulatory development to ensure ongoing organizational readiness.

The following table presents the fair value of mortgage investments referencing IBORs subject to IBOR reform that have yet to transition to alternative benchmark rates and maturing after the date of permanent cessation as at December 31:

| | 2023 | 2022 |
|---------------------------------------|---------------|-----------------|
| Canadian Dollar Offered Rate (CDOR) | \$ 831,632 | \$ 1,514,653 |
| London Interbank Offered Rate (LIBOR) | _ | 1,161,361 |
| | \$ 831,632 | \$ 2,676,014 |

(ii) Currency risk:

Currency risk is the risk that the value of financial instruments denominated in currencies other than the functional currency of the Fund will fluctuate due to changes in foreign exchange rates.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

(d) Market risk (continued):

(ii) Currency risk (continued):

As at December 31, the Fund through the US Mortgage Opportunity Fund holds net financial assets denominated in U.S. dollars totaling CAD\$2,419,565 (2022 - CAD\$1,994,941), which represents 40.3% (2022 - 34.8%) of the net asset value of the Fund. If the Canadian dollar had strengthened or weakened by 1.0% (100 bps) in relation to all other currencies, holding all other variables constant, net assets would have decreased or increased, respectively, by approximately CAD\$24,196 (2022 - CAD\$19,949), representing 0.4% (2022 - 0.3%) of the Fund's net assets. Actual trading results may differ from the above sensitivity analysis and the difference could be material.

As at December 31, the Fund had additional exposure to currency risk through future unfunded commitments to its US mortgage investments totaling CAD\$602,844 (2022 - CAD\$2,105,487). If the Canadian dollar had strengthened or weakened by 1.0% (100 bps) in relation to all other currencies, holding all other variables constant, future unfunded commitments would have decreased or increased, respectively, by approximately CAD\$6,028 (2022 - CAD\$21,055). In practice, the actual trading results may differ from this sensitivity analysis and the difference could be material.

(ii) Other price risk:

Other price risk is the risk that the fair value of the financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment or its issuer or factors affecting all instruments traded in the market.

All financial instruments are subject to other price risk and a potential loss of capital. The maximum risk is determined by the market value of the financial instruments. There are established investment criteria for the Fund related to diversification of investments and investment mandates for external managers to avoid undue market risk.

Country Risk

The Fund's foreign investments may be subject to potential volatility due to political, social, and financial instability within its local region. To mitigate country risk, the Fund diversifies investments amongst countries and seeks investments in countries with stable legal, political, and financial systems.

As at December 31, the Fund's mortgage investments and mortgage investee funds are concentrated in the following geographic regions:

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

9. Financial risk management (continued):

- (d) Market risk (continued):
 - (ii) Other price risk (continued):

Country Risk (continued):

| | 2023 | | 202 | 22 |
|---------------|-----------------|------------|-----------------|------------|
| | Total | % of Total | Total | % of Total |
| Canada | \$ 3,857,105 | 61.7 | \$ 3,576,076 | 66.3 |
| United States | 2,403,796 | 38.3 | 1,812,833 | 33.7 |
| Total | \$ 6,260,901 | 100.0 | \$ 5,388,909 | 100.0 |

If the prevailing fair value of total mortgage investments increased or decreased by 10%, with all other variables held constant, net assets attributable to holders of redeemable units would have increased or decreased, respectively by approximately \$626,090 (2022 - \$538,908). In practice, the actual results may differ from this sensitivity analysis and the difference could be material.

10. Fair value of financial instruments

(a) Fair value hierarchy

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Fund determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The Fund's investments consist of investment in the Mortgage Funds and an equity investment which are measured based on the fair value of the net asset value ("NAV") of these entities. The fair value of NAV are considered Level 3 in the fair value hierarchy.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

10. Fair value of financial instruments (continued):

(a) Fair value hierarchy (continued):

The table below further discloses the underlying components, which in aggregate comprise the NAV of the Fund's investments, by the level in the fair value hierarchy into which the fair value measurement is categorized. All fair value measurements are recurring.

(b) Valuation models

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

10. Fair value of financial instruments (continued):

(b) Valuation models (continued):

The Fund uses widely recognized valuation methods for determining the fair value of common financial instruments. Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk free and benchmark interest rates, credit spreads and other factors used in estimating discount rates and money market prices.

Observable prices and model inputs are usually available in the market for equities. The availability of observable market prices and model input reduces the need for management judgment and estimation and reduces the uncertainly associated with the determination of fair values. The availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

(b) Valuation framework

The Fund has an established framework with respect to the measurement of fair values and applies the following processes in relation to the determination of fair values:

- verification of observable pricing inputs;
- annual risk rating assessment of Canadian fixed rate mortgages performed by an accredited independent third-party provider;
- investigation of risk rating changes above predetermined thresholds:
- positive assurance on US fixed rate mortgages provided by an accredited independent thirdparty valuator;
- · annual credit risk review and impairment analysis of variable rate mortgages; and
- review of documents obtained from third-parties to support the conclusion that such valuations are appropriate and meet the requirements of IFRS Accounting Standards, when third-party information, such as audited financial statements or external valuations, is used to measure fair value.

(d) Significant unobservable inputs used in measuring fair value

The following table sets out information about significant unobservable inputs used at the reporting date in measuring the fair value of investments categorized as Level 3 in the fair value hierarchy as at December 31:

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

10. Fair value of financial instruments (continued):

(d) Significant unobservable inputs used in measuring fair value (continued):

Significant unobservable inputs are developed as follows:

Discount rate

Represents the discount rate applied to the expected future cash flows. For the discount rates used, management assesses both the risk premium and the appropriate risk free rate based on the economic environment in which the mortgage investments are subject to. The discount rate is adjusted for such matters as liquidity differences, credit and market factors. The estimated future cash flows are then discounted using the discount rate determined. Cash flows used in the discounted cash flow model are based on projected cash flows of the respective investment.

Enterprise value

Represents the enterprise value of investee company. An external valuator develops an enterprise value of the investee company based on the appropriate discount rates and terminal rates applicable to its projected cash flows. The enterprise value is then adjusted for QuadReal's working capital to arrive at the net asset value. Inputs to the valuation are obtained from management of the investee company in addition to review of general market and industry data, including specific peer comparables with respect to transactions and trading multiples analysis when available.

Net asset value

Represents the net asset value of the unlisted mortgage investee funds. Management values unlisted mortgage investee funds primarily based on the net asset value presented in the audited financial statements provided by their general partners.

Net recoverable value

Represents the estimated recoverable value of the mortgage investments from selling the underlying collateral assets less any costs associated with the sale. The net recoverable value is derived from underwriting the collateral assets by internal specialists or a market estimate developed by an external valuator, based on the general market and industry data as well as asset specific conditions. Inputs to the valuation are obtained from financial agreements, asset operating results and leasing data from the asset sponsor.

(i) Effects of unobservable inputs on fair value measurement

The fair value of the Fund's investments would fluctuate in response to changes in specific assumptions for determining each of the unobservable inputs. Although the Fund believes its estimates of fair value in Level 3 are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value and net assets attributable to holders of redeemable units.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

10. Fair value of financial instruments (continued):

- (d) Significant unobservable inputs used in measuring fair value (continued):
 - (i) Effects of unobservable inputs on fair value measurement (continued):

The following table shows how net assets attributable to holders of redeemable units would change if the unobservable inputs used in measuring the fair value of the respective investments were to change by the following:

| | | 2023 | | _ |
|----------------------------|--------------------|-------------|------------|--------------|
| | Unobservable input | Sensitivity | Favourable | Unfavourable |
| Fixed rate mortgages | Discount rate | 1 % \$ | 50,706 | \$ (50,706) |
| Fixed rate mortgages | Net recoverable | | | |
| | value | 10 % | 57,844 | (57,844) |
| Variable rate mortgages | Discount rate | 1 % | 43,231 | (42,106) |
| Equity investment | Enterprise value | 10 % | 8,688 | (8,688) |
| Other mortgage investments | Net asset value | 10 % | 3.869 | (3,869) |
| Other mortgage | Net asset value | 10 /0 | 3,003 | (3,009) |
| investments | Discount rate | 1 % | 36 | (35) |

| | | 2022 | | |
|----------------------------|--------------------|-------------|------------|--------------|
| | Unobservable input | Sensitivity | Favourable | Unfavourable |
| Fixed rate mortgages | Discount rate | 1 % \$ | 35,223 | \$ (35,223) |
| Variable rate mortgages | Discount rate | 1 % | 62,126 | (60,216) |
| Equity investment | Enterprise value | 10 % | 7,319 | (7,319) |
| Other mortgage investments | Net asset value | 10 % | 4,513 | (4,513) |
| Other mortgage investments | Discount rate | 1 % | 54 | (52) |

(e) Financial instruments not measured at fair value

The carrying value of cash, accounts receivable, distributions receivable and other accounts payable approximate their fair value given their short-term nature.

11. Involvement with structured entities

The Fund's investments are held primarily through the Mortgage Funds, which in turn hold investments through holding corporations and a limited partnership, all of which constitute structured entities. Structured entities are entities that have been designed so that voting or other similar rights are not the dominant factor in determining who controls the entity. Structured entities have been set up to manage legal, tax and other risks that may arise in the course of administering the underlying investments.

Notes to Financial Statements (Expressed in thousands of dollars, except number of units)

Year ended December 31, 2023

11. Involvement with structured entities (continued):

| | | 2023 | |
|----------------|------------------------|----------------------------------|--|
| | Number of pooled funds | Total net assets of pooled funds | Carrying amount representing the Fund's interest |
| Mortgage Funds | 2 | \$ 6,332,489 | \$ 6,332,489 |
| | | | |
| | | 2022 | |
| | Number of pooled funds | Total net assets of pooled funds | Carrying amount representing the Fund's interest |
| Mortgage Funds | 2 | \$ 5,602,028 | \$ 5,602,028 |

In addition, the Mortgage Funds hold interests in other structured entities indirectly through intermediary investment entities. The other structured entities are indirectly held investee funds administered by third party managers which are organized as limited partnerships, co-investments and equity participation investments. All of these investee funds have been constituted to manage assets on behalf of third-party investors and are financed through the issuance of units to investors or capital contributions made by the investors. Accordingly, the Fund's interest in these entities is reflected through the holding of trust units, partnership units or a partnership interest. The table below sets out the indirect interests held by the Fund in the other structured entities:

| | | 2023 | |
|--|--------------------------|------------------------------------|--|
| | Number of investee funds | Total net assets of investee funds | Carrying amount representing the Fund's interest |
| Unlisted mortgage investee funds administered by third | | | |
| party managers | 4 | \$ 236,618 | \$ 41,743 |
| | | 2022 | |
| | Number of investee funds | Total net assets of investee funds | Carrying amount representing the Fund's interest |
| Unlisted mortgage investee funds administered by third | | | |
| party managers | 5 | \$ 276,677 | \$ 47,881 |

The carrying amount of the investments held in these underlying funds represents the Fund's maximum exposure to loss. During 2023 and 2022, the Fund did not provide financial support to these structured entities and has no intention of providing financial or other support.
